

Nylon 66 Industrial Tape

**Precision-woven nylon 66 tape
designed for high strength, stability,
and industrial performance
for reinforcement, hose, and industrial applications**

KIRAN ENTERPRISE

Textile Tape & Narrow Fabric Manufacturer

NYLON 66

High-performance nylon 66 woven tape designed for strength, durability, and consistent industrial applications

Manufactured using controlled weaving processes to ensure uniform structure, high tensile strength, and reliable performance in demanding industrial environments.

Precision weaving process for high-strength nylon 66 industrial tape

Ideal for general industrial and medium-duty reinforcement applications

Features

- Balanced strength suitable for general industrial applications
- Durable woven structure for consistent load handling
- Controlled weaving ensures uniform thickness and stability
- Good resistance to wear and regular industrial use

Advantages

- Versatile performance across multiple industrial applications
- Reliable strength for medium-load requirements
- Easy handling and integration into production systems
- Consistent quality across batches for dependable use

Applications

- Industrial strapping and binding
- Bag straps and load-support applications
- General reinforcement in industrial products
- Packaging and material handling

Benefits

- Provides dependable strength for everyday industrial use
- Enhances durability without excessive weight
- Cost-effective solution for medium-duty applications
- Suitable for a wide range of industrial requirements

Technical Specifications

Material	Nylon 66
Melting Point	260°C
Breaking Strength	550.5 kgf (~5.4 kN)
Elongation	28.5%
Yarn Denier	225D
Width	50 mm
Thickness	0.036 mm

Quality & Testing

- Tested at SASMIRA (Govt. approved lab)
- Complies with IS 1969 & ASTM standards
- Batch-controlled production Consistent
- mechanical properties
