

Doubling Yarn

High-quality doubling yarn designed for strength, uniformity, and consistent textile performance

for weaving, knitting, and textile manufacturing applications

KIRAN ENTERPRISE

Textile Tape & Narrow Fabric Manufacturer

DOUBLING YARN

High-quality doubling yarn designed for strength, uniformity, and consistent textile applications

Produced using controlled doubling processes to ensure balanced twist, smooth texture, and consistent yarn quality for reliable textile performance

Controlled doubling process ensuring uniform yarn structure

Available in multiple colors and specifications for textile applications

Features

- Uniform twisting for balanced yarn structure
- Smooth surface for efficient weaving and knitting
- Consistent thickness and quality
- Suitable for various textile applications

Advantages

- Improves strength and durability of final fabric
- Ensures smooth processing in textile machinery
- Reduces yarn breakage during production
- Reliable performance across batches

Applications

- Weaving and knitting processes
- Textile manufacturing and fabric production
- Industrial and garment applications
- General-purpose yarn usage

Benefits

- Enhances fabric strength and finish quality
- Improves efficiency in textile production
- Reduces production defects and wastage
- Cost-effective solution for consistent output

Technical Specifications

Material	Cotton / Polyester (as per requirement)
Count Range	Custom
PLY	2-ply,3-ply, other
Twist Direction	S / Z
Color	Natural /Dyed
Finish	Smooth
Packaging	Cone / Spool

Quality & Testing

- Manufactured using controlled doubling processes
- Consistent yarn count and uniform twist
- Quality checked for strength and smoothness
- Batch-controlled production
